

EXTREME DANGER

The "safe and effective" 5G towers above us are wide-area military-grade directed energy weapons of mass destruction. They have been killing all the birds, animals, insects, and trees, and torturing people in various countries throughout the world. They are equipped to be turned up in power to six million watts per tower in terahertz frequency radiation to completely melt everything and everyone in the entire world. This is no joke.

The police know but only care about their paychecks.

This spells death for you and everyone you care about, and the complete destruction of all your precious lifetime investments. Expect exploding trees, melting cars and buildings, boiling oceans, and burning air, your skin melting, organs boiling, and body exploding into a bloody mess like microwaved chicken.

Paid rioters and TV crisis actors won't prevent this.
